Dear Hiring Manager,

I am excited to apply for the position of Mechanical Assistant Plant Engineer/Officer at OPG Thunder Bay, as advertised on your website. With a Master of Science in Mechanical Engineering, experience as an engineering project manager, and expertise in both mechanical and electrical engineering, I am confident that I have the skills and knowledge to excel in this role.

In my current role as an engineering project manager, I gained extensive experience in managing projects from conception to completion. This involved coordinating with various stakeholders, ensuring compliance with regulatory requirements, and managing project budgets and timelines. I also developed strong problem-solving skills, as I worked to identify and address technical issues that arose during project execution.

My knowledge of the OH&S Act and Regulations, especially for Industrial Establishments (Ont. Reg. 851) and Construction (Ont. Reg. 213) in Ontario, as well as the various codes and standards associated with mechanical engineering, has been invaluable in my previous roles. This knowledge has enabled me to ensure the safety of personnel and equipment, while also ensuring compliance with regulatory requirements.

In addition to my experience in mechanical engineering, I also have a background in electrical engineering, which has provided me with a comprehensive understanding of the systems and components that make up power plants. This knowledge has enabled me to work effectively in cross-functional teams, collaborating with other engineers and technicians to identify and address issues that affect the performance of the plant.

I am excited about the opportunity to join OPG Thunder Bay and contribute my skills and knowledge to the team. Thank you for considering my application.

Sincerely,

Adam Genno, C.E.T., EIT
